

Rocco logs

Kg. 10

Logs, otherwise known as briquettes, are cylinders of pressed wood obtained through the mechanical process of sawdust compression which, combined with the binding power of lignin, gives rise to an excellent alternative fuel to traditional firewood. They are normally used in stoves, fireplaces and any other type of heating system and represent a pleasant source of heat from renewable sources.

Their ease of use is combined with their practical packaging in convenient 10 kg cardboard boxes, which simplifies transport and reduces soiling.

In addition, the small space occupied allows easy storage in any environment.

Rocco, the log that does not disappoint!

Encoding

Trademark	Rocco
Item code	TronchettoRocco10kg
EAN code	8054726040057
TARIC code	44013900

Characteristics

Certification	FSC®
Raw material	Virgin wood
Moisture	< 10%
Binding agents	Not present
Diameter	75-90 mm ca.
Length	300 mm ca.
Ash	< 1%
Bulk density	750 kg/m ³
Calorific value	5.000 Kcal/kg

Sales unit

Description	Cardboard box containing no. 8 logs
Net/gross weight	Kg. 10,000 / Kg. 10,470 ca.
Measures (L/W/H)	cm 32 x cm 26 x cm 17 ca.

Palletizing

Net/gross weight	Kg. 900 ca. / Kg. 957 ca.
Measures (L/W/H)	cm 120 x cm 80 x cm 160 ca.
No. pieces per layer	no. 10 boxes
No. layers per pallet	no. 9 layers
No. pieces per pallet	no. 90 boxes
